

Dynamic Loading
Machine

Technical Specifications

- Has a protective frame
- Ability to apply a blow to 1000 strokes
- Usability for any type of flooring
- In accordance with standard number Bs 4052, iso 2094
- Digital LCD display and flat keyboard

Advantages

The dynamic loader device can measure the amount of carpet thickness under moving load. This method is applicable to all floors with a uniform level in terms of height and density. This method is not applicable to other textile floorboards, except where the surfaces with Different thicknesses and densities are tested separately.
